TE-10000W-1GD_x??,???? 50 ohm ????????????????? (??)?? DC ? 1000 MHz ??? 10,000 ?????

TE-10000W-1GD_x RF load is a completely non-inductive resistor specially designed for high frequency and RF equipment. It has excellent stability and can withstand high power use. It is air-cooled and oil-cooled for universal 50 ohm coaxial RF transmission lines. Terminators (dummy loads) that provide accurate, reliable and low-reflection line termination from DC to 1000 MHz and can consume up to 10,000 watts of power.
