² Two signal ports with full duplex design.

² Linear power amplification to effectively suppress inter-modulation and spurious emission.

² Stable and improved signal transmission quality.

- ² Compact size with stable performance.
- ² Smart Automatic Level Control (ALC) ensures output level stable and adjustable continuously.
- ² Auto Isolation check between service and donor antennas.
- ² Auto shut off function available for both uplink and downlink.
- ² Simple installation with external AC/DC adapter.
- ² Cost-effective for practical solutions.
