- ² Supports voice and data services
- ² World's first 3500MHz 5G NR solution supporting 270MHz bandwidth.
- ² Optical transmission up to 10km (max.)
- ² Digital filtering, reducing interference, improving quality
- ² Built in Automatic Gain and Automatic Level Control Function (AGC/ALC) to maintain stable operation
- ² Support LTE-FDD/5G NR Access Technology
- ² Optional Internal and External Antennas
- ² RJ45 Cable for local connection & Wireless modem for remote monitoring (optional)
- ² Delay compensation function, simple system optimization
