Key features

2

Intelligent and modular power amplifier unit adopts high gain and high linearity

LDMOS tube imported power amplifier module, low power consumption and ultra-linear design to improve its transmission efficiency.

2

It adopts switch regulated power supply, with wide regulated range and high efficiency.

2

The user's use environment and conditions are fully considered in the design, so that the equipment can work 24 hours and be unattended.

2

Modular structure, easy installation and maintenance.

2

All nameplates are laser engraved, beautiful, clear and not easy to wear.
